MM. 80

Que. 1-5. Read the following passage and answer the question that follow:-

the main goal of “skill India” programme is to create opportunities space and scope for the development of the talents of the Indian youth and to develop more of those sectors which have already been put under skill development for the last so many years and also to identify new sectors for skill development. the new programme aims at providing training and skill development to 500 million youth of our country by 2020, covering each and every village. various scheme are also proposed to archive this objective.

the emphasis is to impart skill to the youth in such a way that they get employment and also improve entrepreneurship.

the programme provides training, support and guidance for all occupations that were of traditional type like carpenters, cobblers, welders, blacksmith, masons, nurse, tailors, weavers etc.

more emphasis will be given on new areas like real estate, construction, transportation, textile, gem industry, jewelry designing, banking tourism and various other sectors, where skill development is inadequate or nil. the training programmes would be on the lines of international level so that youth of our country could not only meet the domestic demands but also of other countries like the U.S.A., Japan, china, Germany, Russia and those in the west Asia.

the course methodology of “skill India” would be innovative, which would include games, group discussions, brainstorming sessions, practical experience, case studies etc. it is not that we do not have any skill development programme already. the government of India has always considered skill development as a national priority. it is just that since the ministry is new, the approach taken for skill development is also new. earlier the emphasis was on traditional jobs. But time all kinds of jobs will be given equal emphasis.

the India is to raise confidence, improve productivity and give direction through proper skill development will enable the youths to get blue-collar jobs. development of skill, at a young age, right at the school level is very essential to prepare them for proper job opportunities.

SECTION-A
(Reading)

Q1-9 Read the passage given below and answer the questions that follow:

Today there is a lot of talk about the environment. All nations are coming to an agreement to save planet earth. We pollute the earth, we pollute the water, we also pollute the subtle environment through our negative feelings and emotions. We have become a victim of our greed and needs. We are not in control of our mind. We hear a lot about other things in but we spend very little time to hear about ourselves. How to handle our mind? How to be in the present not learnt. This is the most unfortunate thing. Then what is the solution? This is where we are reminded of a very fundamental principle that governs our environment our mind, our emotions and our life in general.

Our body has the capacity to sustain much longer the vibration of bliss and peace than it does negative emotions because positivity is in the centre of our existence. As with the structure of atom, protons and neutrons are in the centre of the atom and elections constitute only the periphery, the same is with our lives; the centre core of our existence is bliss, positivity and joy but it is surrounded by a cloud of negative ions. Through the help of the breath we can easily get over our negative emotions in a short period of time. Through meditation and certain breathing technique, we can clear this negative cloud.

This life has so much to offer to you. You can see this once you take some time off, rejuvenating the soul. Your soul is hungry for a smile from you. If you could give this, you feel energised the whole year and nothing whatsoever can take the smile from you.

Everyone wants to be successful in life. But without knowing what is success, you want to be successful. What is success, you want to be successful. What is the sign of success? Just having a lot of money, is that success? Why do you think money means success? Because money gives you freedom so that you can do whatever you want. You may have a big bank balance, but you have stomachaches, ulcers, you may have to go for bypass surgery; can't eat this, can't do this, can't do that. We expend half our health to gain wealth and then spend half our wealth to gain back the lost health. Is this success? Infact, it is very bad mathematics.

Look at the those who claim to be successful are they successful? No, they are miserable. Then what is the sign to success? It is confidence, compassion, generosity and a smile that none can snatch away, being really happy and being able to be more free. These are the signs of successful person.

Take some time off to look a little deeper into yourself and clam the mind down. Thus, erasing all the impressions that we are carrying in our minds and experience the presence of the divine that is the very core of our existence.

- Que. 1. What is the most unfortunate thing? (1)
- Que. 2. How can we get rid of our negative emotions? (1)
- Que. 3. What is 'Bad mathematics' according to the passage? (1)
- Que. 4. What are the main signs of successful person? (1)
- Que. 5. What is said about the environment? (1)

Q10-11 Read the passage given below and answer the questions:

Information technology and library services are two facts of the same coin. In a village set up, mostly the young and the old use libraries and the middle aged make little use of these libraries. They need job related information to update their skills and knowledge. The library and information service play a dominate role in catering to education, information and recreational requirements of society. Library is an instrument of social change. All along the concept of library has be associated with literary and books and the librarian was considered the keeper of books. Concurrent with change in society, the concept of library has changed. It is a multimedia centre and a place for learning resources for the literate as well as the illiterate. Education is the key to individual achievement and national strength. Integrated approach in starting at least a reading in every hamlet is the need of hour. Co-ordination between Department of Education and Panchayati Raj in spreading the library movement is of paramount importance. Amalgamation of adult education, Programme with the

library programmes also needs to be given a greater thought. The school can function in a hamlet or a village serving the common needs of students and public. The massive permanent building programmes for weaker sections in rural areas should earmark at least one house for every 1000 houses or in every cluster for library purpose. The services of a retired teacher or retired employee in that hamlet can be availed. A person residing in the same hamlet is more useful with inherent advantages than an outsider for library has to function in the evening hours and to be extended for T.V. and Internet operations also. Information technology, Internet and e-commerce have great potential in catering to public needs. However we have to be pragmatic in our approach in terms of electronic access to information in rural areas. Availability, affordability, accessibility, acceptability and sustainability of the service should also be kept in view. Once a common service place is identified, the IT based services can conveniently be cushioned on. It is hoped that the state and central government will give top priority to this minimum facility.
