Preface

The Ministry of Human Resource Development (MHRD), Government of India introduced vocational courses from Class 9th onwards under the revised Centrally Sponsored Scheme of Vocationalisation of Secondary and Higher Secondary Education. The MHRD also developed a National Vocational Education Qualifications Framework (NVEQF), which was subsumed in National Skills Qualifications Framework (NSQF) in 2013. The NSQF organizes qualifications according to a series of levels of knowledge and skills. These levels are defined in terms of learning outcomes i.e. the competencies (knowledge, skills and attitude) which the learners must possess, regardless of whether they were acquired through formal, non-formal or informal education and training system. Qualifications are made up of occupational standards for specific areas of learning units or unit of competency. Units of competency are the specification of knowledge and skill to the standard of performance expected in the workplace. The unit of competency or National Occupation Standards, comprising generic and technical competencies that an employee should possess, are laid down by the Sector Skill Council of the respective economic or social sector.

Competency is defined in terms of what a person is required to do (performance), under what conditions it is done (conditions) and how well it is to be done (standards). It can be broadly categorized into foundational, practical and reflexive competencies. Generic competencies are considered essential for a person to participate effectively in the workforce, whereas technical competencies are an individual’s knowledge and expertise in the specific group task, its processes and its rules and regulations.

The competency based curriculum is broken down into coherent parts known as Units. Each unit is further broken down into knowledge and skills on the basis of which evidence is to be provided by the learner and the evaluation is to be done by the teacher or trainer.

The PSS Central Institute of Vocational Education (PSSCIVE), a constituent unit of National Council of Educational Research & Training (NCERT) is an apex research and development Institute for vocational education. The institute has been mandated by the MHRD to develop curricula and courseware for vocational subjects to be introduced from Classes 9 to 12 under the NSQF.

The curriculum has been developed and reviewed by a group of experts and their contributions are admirably acknowledged. The utility of the curriculum will be adjudged by the qualitative improvement that it brings about in teaching-learning in vocational subjects. The feedback and suggestions on the content will be of immense value to us in bringing about necessary improvement in the curriculum.

Prof. (Dr.) R.B. Shivagunde
Joint Director and Head,
PSS Central Institute of Vocational Education, Bhopal

### NSQF Level 1 (Class 9)

- HSS101-NQ2015: Healthcare Delivery Systems 05
- HSS102-NQ2015: Role of the Patient Care Assistant 06
- HSS103-NQ2015: Personal Hygiene and Hygiene 07
- HSS104-NQ2015: Primary Healthcare and Emergency Medical Response 08
- HSS105-NQ2015: Immunization 09
- HSS106-NQ2015: Communication at Workplace 09

### NSQF Level 2 (Class 10)

- HSS201-NQ2015: Hospital Structure and functions 10
- HSS202-NQ2015: Introduction to Care Plan and Care of Patients 11
- HSS203-NQ2015: Sterilization and Disinfection 12
- HSS204-NQ2015: Basic First Aid and Emergency Medical Relief 14
- HSS205-NQ2015: Human Body: Structure, Functions and Nutrition 14
- HSS206-NQ2015: Public Relations in Hospital 15

### NSQF Level 3 (Class 11)

- HSS301-NQ2015: Hospital Management System - II 16
- HSS302-NQ2015: Drug Delivery System 18
- HSS303-NQ2015: Microbiology, Sterilization & Disinfection II 19
- HSS304-NQ2015: Handling Emergency Services 21
- HSS305-NQ2015: Administration of Medication 22
- HSS306-NQ2015: Physiotherapy 23

### NSQF Level 4 (Class 12)

- HSS401-NQ2015: Medical Record / Documentation 24
- HSS402-NQ2015: Role of General Duty Assistance in Elderly & Child Care 25
- HSS403-NQ2015: Bio-waste Management 26
- HSS404-NQ2015: Operation Theatre 28
- HSS405-NQ2015: Role of General Duty Assistance in Disaster Management & Emergency Response 29
- HSS406-NQ2015: Self Management and Career Scope 30

1.0 About the Course

Healthcare sector in India has been growing rapidly over the years and it is estimated to reach US$ 280 billion by 2020. Consequently, the sector is also experiencing an incremental demand for human resource across verticals; from doctors and nurses to allied health professionals and technicians. As per the recent PHFI report, India has a shortfall of 6 million allied healthcare professionals in the country. India is far behind global standards in terms of availability of doctors per 1000 people.

To meet the growing human resource challenges, the National Skill Development Corporation (NSDC) and the Confederation of Indian Industry (CII) have constituted the Healthcare Sector Skill Council (HSSC). The Council is expected to promote a vibrant vocational education and training system in healthcare in the country by setting up occupational standards, affiliating training institutes, assessing competency of trainees and issuing certificates in healthcare sector. The Council aims to facilitate skilling of 4.8 million people over the next 10 years in allied health and paramedic space.

One of the job roles in the healthcare sector is the Personal Care Assistant/General Duty Assistant. A Patient Care Assistant works under the direction and supervision of registered nurses and other medical staff. Personal Care Assistant is in direct contact with patients and provides personal care, such as bathing, feeding and dressing. They also perform support functions, such as transporting patients, taking vital signs, making bed and answering patient calls. They might also be called upon to set up equipment such as X-ray machines and overhead irrigation bottles. Personal Care Assistant is often responsible for observing and reporting how patient is responding to the care that is being given.

The various functions of a PCA/GDA are as follows:

- Assist Nurses in looking after the patients;
- Transport the patients to the various areas of Hospitals;
- Perform everyday jobs and carry messages;
- Clean and dusts beds, doors, windows and other furniture;
- Render first aid to the patients when required;
- Prepare dead bodies and arrange their transportations to the mortuary.
2.0 Objectives of the Course

Upon completion of the course, you will be able to:

- Demonstrate techniques to maintain the personal hygiene needs of a patient;
- Demonstrate the ability to perform essential clinical skills for providing basic healthcare services;
- Demonstrate the knowledge of safety, usage of protective devices and precautions while using oxygen;
- Demonstrate professional behaviour, personal qualities and characteristics of a Patient Care Assistant;
- Demonstrate the knowledge of Immunization schedule and National Immunization programme;
- Demonstrate the knowledge of bio-medical waste and its management;
- Demonstrate the knowledge of emergency medical response and other actions in the event of medical emergencies;
- Demonstrate effective communication skills for a Patient Care Assistant;
- Demonstrate the knowledge of role and functions of healthcare professionals and staff in different departments of hospitals;
- Assist healthcare professionals in the development and implementation of Care Plan;
- Perform various activities for prevention and control of Hospital Acquired Infections;
- Assist in administering First Aid and providing Emergency Medical Relief; and
- Assist in developing and maintaining public relations.
### 3.0 Course Structure

This course is a planned sequence of instructions consisting of modules called as Units. Each level has 06 Units.

#### NSQF Level 1 (Class 9)

### 4.0 Classroom Activities

Classroom activities are an integral part of this programme and interactive lecture sessions, followed by discussions should be conducted by trained teachers. Teachers should make effective use of a variety of instructional aids, such as Videos, Color Slides, Charts, Diagrams, Models, Exhibits, Handouts, Recorded Compact Discs, etc. to transmit knowledge in projective and interactive mode including

### 5.0 Practical Activities

Activities that provide practical experience in clinical set up would include hands on training on mannequins, simulated clinical set up, case based problems, role play, games, etc. on various clinical incidents and practical exercises in skill lab. Equipment and supplies should be provided to enhance hands-on experiences for students. Trained personnel should teach specialized techniques. A training plan signed by teacher that reflects equipment, skills and tasks should be prepared for training of the students in the organization/industry.

### 6.0 On-the-Job Training

On-the-job training (OJT) occurs whenever more experienced employee or supervisor teaches less experienced person on how to do one or more tasks of a job. The training utilizes actual equipment and materials. OJT should be undertaken in a structured manner with a training plan under the supervision of an experienced trainer or supervisor. A training plan that reflects tasks to be performed and competencies to be imparted should be prepared and signed by the student, teacher, and supervisor at the workplace for training of the students in the organization/industry. The trainer should break down all the steps of the job and train the students as per the training plan. In a structured OJT, the following steps should be followed:

1. **Step 1:** The Instructor or the trainer, tell, show, demonstrate, and explain. The trainer gives an overview of the task while explaining the constructional details and use of the tools, equipment, materials, etc. in performing the tasks.

2. **Step 2:** The Instructor or the trainer demonstrates each step in detail, actually doing the steps of the task and explaining each step, one at a time, while the trainee watches. The steps may not necessarily be demonstrated in the sequence of actual operation, as sometimes it is better that simple tasks are demonstrated first to build confidence. Showing finished products at each appropriate step will help the trainee understand what is required as outcome. While demonstrating, the trainer explains why each step is done in the way it is done.

3. **Step 3:** The trainee practices with clearly defined targets for performance standards.

4. **Step 4:** The trainee practices with clearly defined targets for performance standards.

### 7.0 Certification

Upon successful completion of this course, the State Education Board and the Healthcare Sector Skill Council will provide a certificate to the student verifying the competencies acquired by the candidate. For more details about SSC visit the website of Healthcare Sector Skill Council at http://www.healthcare-ssc.in/

|                                        | Demonstrate the knowledge of roles and functions of various departments, professionals and supportive staff of the hospital | • Describe the roles and functions of various departments and professionals in the hospital | • Identify the various types of hospitals  
• Distinguish between General Hospital and Specialized Hospital  
• Draw a chart depicting the roles of departments, professionals and supporting staff of the hospital | Interactive Lecture: Roles and Functions of Hospitals  
Activity:  
• Visit nearby hospital and study the roles and functions of the various departments, professionals and supportive staff of the hospital  
• Prepare a chart depicting the roles and functions of departments/professionals/supporting staff |
|                                        | Demonstrate the knowledge of roles and functions of supporting departments in hospital | • Describe the role and functions of various supporting departments of hospital  
• State the services provided by the Medical Record Department and Outpatient Department  
• Explain the activities performed by the hospital housekeeping department | • Draw a chain of command in the various department and laboratories of hospital | Interactive Lecture: The Roles and Functions of Various Supporting Departments in the Hospital  
Activity:  
• Visit nearby hospital and study the roles and functions of the various supporting departments in hospital  
• Prepare a chart showing the chain of commands in various departments |
|                                        | Classify the hospitals on the basis of different criteria | • State the criteria used for classifying the hospitals  
• Describe the different levels of medical care | • Classify the hospitals on the basis of bed strength, specialty and level of medical care | Interactive Lecture: Classifying Hospital  
Activity:  
• Internet search on hospitals and classify them on the basis of bed strength, specialty and level of medical care |

| Demonstrate the knowledge of the role of General Duty Assistant in feeding a patient | - Describe the characteristics of a healthy person  
- Describe the various types of diets and their importance with regard to nutrition  
- List the various types of diet available in the hospital / home  
- Demonstrate the knowledge of feeding and assisting patients with their meals, keeping in view their needs and in a safe and dignified manner | Interactive Lecture: Feeding Patients | - Visit a hospital and observe the type of diets being served to different patients.  
- Observe the procedure adopted by the General Duty Assistants/ Nurses in feeding patients  
- Prepare a diet chart for feeding a patient |
| Identify and report vital signs                                      | - List the important vital signs of the body  
- Describe the abnormal vital signs  
- Demonstrate the knowledge of taking temperature, reading pulse rate and measuring blood pressure  
- Fill the forms for documenting information on vital signs | Interactive Lecture: Identifying and Reporting Vital Signs | - Visit a nearby hospital and observe the procedures and recording being done for vital signs |
| Prepare bed according to the patient’s need                         | - Describe the features and importance of various types of bed in a hospital  
- Describe the various steps of bed making  
- Describe the roles and functions of General Duty Assistant in bed making  
- Demonstrate the knowledge of articles used in bed making  
- Demonstrate the steps involved in making of open bed | Interactive Lecture: Preparing Bed for Patients | - Visit a nearby hospital and learn the steps for making bed |
| Position the patient according to the need                           | - Enlist various positions of patients  
- Describe therapeutic position  
- Describe the importance of Fowler’s position  
- Identify the various position of a patient  
- Demonstrate the procedure (s) for changing the patient’s position | Interactive Lecture: Positioning the patient | - Visit a nearby hospital and learn the various positions in which patients are placed on the bed |

| Describe the principles and rules of First Aid | • Describe the purpose of First Aid  
• State the principles of First Aid | • Identify types of health risks and hazards at various departments of hospitals  
• Enlist emergency situations in a hospital  
• Perform Airway, Breathing and Circulation on a dummy | Interactive Lecture: Principles and Rules of First Aid  
Activity:  
• Visit a hospital and study the First Aid practices |
| Identify facilities, equipment and materials used for First Aid | • Describe the facilities and materials used for administering First Aid | • Enlist the equipment used for First Aid  
• Demonstrate the knowledge of the use of First Aid kit | Interactive Lecture: Facilities, equipment and materials for First Aid  
Activity:  
• Prepare a First Aid box |
| Perform the role of first aider in fever, heat stroke, back pain, asthma and food borne illness | • Describe the role and functions of a First Aider | • Perform ABC (Airway, Breathing and Circulation)  
• Measure body temperature using a digital thermometer | Interactive Lecture: Role of First Aider in dealing with fever, heat stroke back pain, asthma and food borne illness  
Activity:  
• Perform activities for measuring and controlling temperature |
| Perform the role of first aider in cuts, bleeding, burns, insect bites and stings, dog bites and snake bites | • Describe the causes of various types of burns  
• Describe the reasons for using different methods for treating burns | • Administer first aid for cut and burns in hypothetical situations  
• Demonstrate the knowledge of dealing with insect, dog and snake bite | Interactive Lecture: Role of First Aider in cuts, bleeding, burns, insect bites and stings, dog bites and snake bites  
Activity:  
• Practice First Aid on a dummy with the help of a First Aider |

Page 16 of 44
| Demonstrate the knowledge of responding to emergency calls | • Describe the knowledge of responding to emergency calls  
• Describe the roles and functions of “on call duty doctor”  
• Describe the various equipment available in a 108 emergency service ambulance | • Demonstrate the knowledge of the responsibility in emergency management activities  
• Demonstrate the knowledge of routine call and emergency call | Interactive Lecture: Responding to emergency calls  
Activity:  
• Visit a nearby hospital and study the major and minor emergency and non-emergency services provided by the hospital |
| Use computers in maintaining public relations | • Describe the impact of technological revolution in healthcare sector  
• Describe the use of computer in hospital administration  
• Identify the use of computer in various sections/departments of a hospital | • Demonstrate the knowledge of applications of computer in hospital  
• Demonstrate the knowledge of maintaining files and records in computer | Interactive Lecture: Using computers in maintaining public relations  
Activity:  
• Visit a nearby hospital and study the use of computer in maintaining files and records in a hospital |
| Demonstrate the knowledge of dealing with patients, attendant | • Enlist the general stressful situations in hospital  
• Describe the factors affecting relationship between a General Duty Assistant and patient’s attendant | • Demonstrate the knowledge of handling people with emotional stress or emotional outbursts  
• Enlist the skills required for General Duty Assistant in managing stressful situation | Interactive Lecture: Dealing with patient’s attendant  
Activity:  
• Visit a nearby hospital and study health professionals handling the patient’s relatives in emergency situation |

</table>
| HSS301-NQ2015 | Duration: 20 Hours  
Learning Outcome:  
Describe the role of GDA in admission of patient in hospital  
Knowledge Evaluation:  
• Describe the responsibilities of GDA in admitting the patient  
Performance Evaluation:  
• Fill a patient admission form for admitting the patient  
Teaching and Training Method:  
Interactive Lecture: Role of GDA in admission of patient in hospital |

Page 17 of 44
### Assess the health of the patient

- Describe the purpose and procedure of the health assessment
- State effective ways of obtaining health history
- Describe the major components of obstetrical history
- Explain the importance of culture in health assessment
- Assess the health history of the patient on the basis of previous medical reports

### Demonstrate the knowledge of significance, purpose and techniques of the physical assessment of the patient

- Explain the significance and purpose of physical examination
- Describe techniques of physical examination viz.
  - Inspection
  - Palpation
  - Percussion
  - Auscultation
  - Manipulation
- Perform physical examination of the patient
- Use different techniques of the physical examination

### Provide assistance in various examinations of the patient viz. eyes, ears, nose, throat, neck, chest, etc.

- Describe the role of GDA in assisting the health examination of a patient
- Enlist the precautions to be taken while examining height and weight of the patient
- Describe the technique for chest and abdomen examination
- Identify various positions of the patient while the health of the patient is examined
- Assist examination of eyes, ears, nose, throat, neck, chest, etc.

### Collect the specimen of urine, stool, sputum, blood, etc. using different

- Describe various techniques of collecting the specimen of urine, stool, sputum, blood, etc.
- Prepare a chart of the prerequisites of collecting specimen of blood, urine and

---

**Activity:**
- Role Play on admitting the patient in a hospital
- Record personal and medical data of the patient

**Interactive Lecture: Assessing the health of the patient**
- Visit a nearby hospital and collect patient’s health history information
- Visit a nearby hospital and conduct patient’s health assessment

**Interactive Lecture: Physical Assessment**
- Role Play
- Visit a nearby hospital and perform the physical assessment of the patient

**Interactive Lecture: Assisting In Examination**
- Visit a nearby hospital and assist the duty doctor

**Interactive Lecture: Collection of specimen**
- Visit a nearby hospital and assist in

</table>
| Use various equipment and supplies in furnishing the patient’s unit | • Explain the significance and importance of a waste basket in patient’s unit  
• Describe the bedding standards for the patient  
• Demonstrate the knowledge of standard sizes of the bed linen  
• Prepare the patient’s unit according to patient’s needs  
• Identify the different equipment used for patient’s comfort  
• Tabulate the classification of equipment/materials on the basis of health status of the patient |
| Interactive Lecture: Furnishing the patient’s unit |
| Activity: Visit a nearby hospital and prepare a chart of the standard sizes of the mattress, pillow, bed sheets, blankets and bedspread  
Prepare a survey report containing list of the equipment and supplies found on the basis of type of the unit and the health status of the patient. |

**Unit Title: Drug Delivery System**

**Unit Code:**  
**HSS302**  
**NQ2015**  

**Duration:** 20 Hours

**Location:**  
**Classroom / Hospital / Clinic**

**Learning Outcome:**  
Demonstrate the knowledge of different types of drug delivery system operated in the hospital.

**Knowledge Evaluation:**  
• Describe the types of intravenous drug delivery method  
• State the advantages and disadvantages of the various conventional drug delivery systems

**Performance Evaluation:**  
• Demonstrate the knowledge of various drug delivery methods  
• Select the method of drug delivery in a specific situation

**Teaching and Training Method:**  
Interactive Lecture: Introduction to drug delivery system

**Activity:**  
• Prepare a comparative chart of the various drug delivery methods. Also include their advantages and disadvantages.

**Maintain patient’s safety and effectiveness**

**Interactive Lecture:**  
Patient’s safety and effectiveness in drug delivery.

**Discuss Role of GDA in patient safety.**

**Demonstrate the knowledge of patient’s safety.**
| In drug delivery | • Explain model of patient safety  
• State sources of hazards in patient’s safety in different drug delivery systems | measures in drug delivery system  
• Identify the sources of hazards of patient safety in drug delivery system  
• Identify the different safety measure in the hospital in drug delivery system | delivery  
Activity:  
• Visit a nearby hospital to identify the patient safety measures in drug delivery |
|---|---|---|---|
| Administer the drug in the patient’s body through correct route | • Describe different routes of administering the drugs in the patient’s body.  
• Explain the importance of enteral drug delivery route | • Administer any specific drug in the patient’s body through correct route  
• Demonstrate the knowledge of role of GDA in selection of route in drug delivery | Interactive Lecture:  
Routes of drug delivery  
Activity:  
• Visit a nearby hospital and identify the drugs given with different routes. |
| Demonstrate the knowledge of various drug dosage forms | • Explain the criteria to choose drug dosage forms.  
• Explain two main types of capsule.  
• Enlist various drug dosage forms | • Demonstrate the knowledge of dosage formulations  
• Identify the different dosage forms | Interactive Lecture:  
Drug Dosage Forms  
Activity:  
• Visit a nearby hospital and identify the different drug dosage forms. |
| Demonstrate the knowledge of Novel Drug Delivery System | • Explain novel drug delivery method.  
• Explain DPI and MDI.  
• Describe transdermal drug delivery system with its advantage | • Identify the different drug given by novel drug delivery method  
• Enlist various novel drug delivery methods | Interactive Lecture:  
Novel Drug Delivery System  
Activity:  
• Visit a nearby hospital and identify the common example of novel drug delivery system |
| Demonstrate the knowledge of controlled drug delivery system | • Classify the controlled drug delivery system on the basis of mechanism of release  
• Describe osmotic pressure control system  
• Name the mechanisms used to deliver a drug in controlled time and amount | • Identify the use of common drugs in control drug delivery system  
• Demonstrate the knowledge of classification of controlled drug delivery system  
• Release of control drug to the patient | Interactive Lecture:  
Controlled Drug Delivery System  
Activity:  
• Visit a nearby hospital and identify the release of drugs of control delivery system. Prepare a report of the observation. |
## Unit Title: Microbiology, Sterilization and Disinfection II

### Duration: 25 Hours

| Demonstrate the knowledge of process of disinfection | • Describe different types of disinfection  
• Differentiate between concurrent and terminal disinfection  
• Explain the process of fumigation with sulphur | • Enlist best housekeeping practices  
• Demonstrate the knowledge of good housekeeping practices  
• Effectively manage the Isolation Unit | Interactive Lecture: Disinfection of articles  
Activity:  
• Visit a nearby hospital and observe the materials used in cleaning of wards  
• Visit a nearby hospital and observe the personnel involved in housekeeping |
| Demonstrate the knowledge of care of articles in a hospital | • Explain the importance of care of rubber goods.  
• Describe the procedure to undo the contaminated gloves  
• Explain the procedure of removing different kinds of stains  
• Explain the ways of care of syringes and needles | • Demonstrate the knowledge of care of various rubber based articles, ward articles and instruments used in a hospital  
• Demonstrate the knowledge of removing different kind of stains | Interactive Lecture: Care of articles in a hospital  
Activity:  
• Visit a nearby hospital and identify the disinfectant used.  
• Group discussion on care of the articles in the hospital |
| Provide assistance in disinfection of wards in a hospital | • Explain cleaning techniques of different areas of hospital  
• Describe the role of hand hygiene in prevention of infection  
• Describe various cleaning techniques used in hospital | • Identify the various cleaning techniques used in hospital  
• Identify the different chemical used in cleaning the floor of hospital  
• Demonstrate the knowledge of role of GDA in managing disinfection of the wards | Interactive Lecture: Disinfection of wards  
Activity:  
• Visit a nearby hospital and observe the cleaning method of any five departments  
• Visit three hospitals and find the different levels of cleaning in different areas of hospital |
| Demonstrate the knowledge of general surgical asepsis practices | • Explain asepsis and its types  
• Describe the methods of transmission of infection  
• Describe the | • Identify different methods of transmission of infection and asepsis practices  
• Demonstrate the steps of wearing | Interactive Lecture: Surgical Asepsis  
Activity:  
• Visit a nearby hospital and observe the |
| Demonstrate the knowledge of disinfection of operation theater | • Explain surveillance procedures of Operation Theater (OT)  
• Describe fumigation procedure in OT  
• Describe the duties of GDA in OT | • Enlist the precautions to be taken for reducing the rate of infection in OT  
• Identify steps used during fumigation  
• Demonstrate the knowledge of cleaning procedure of Operation Theatre  
• Enlist the guidelines to be adhered for surgical theatre sterility | Interactive Lecture: Disinfection of Operation Theater  
Activity:  
• Visit a nearby hospital and observe the cleaning procedure of operation theaters  
• Visit nearby hospitals and study the type and amount of chemical used in fumigation of OT  
• Prepare a survey report of the articles available in the operation theatre of the hospital |
| --- | --- | --- | --- |
| Demonstrate the knowledge of surgical dressing | • Describe the methods and steps of dressing  
• State different types of dressing  
• Explain the general rules of dressing | • Demonstrate the knowledge of the objectives, characteristics, types and general rules of application of surgical dressing | Interactive Lecture: Surgical Dressing  
Activity:  
Visit a nearby hospital and observe the types of dressing done in the wards. |

**Unit Code:** HSS304-NQ2015

| Receive patient in hospital in emergency condition | • Describe emergency admission procedure  
• Explain discharge procedure | • Demonstrate the knowledge of duties of GDA while admitting an emergency patient  
• Enlist the qualities to be possessed by | Interactive Lecture: Receiving Patient in Hospital  
Activity:  
• Role Play  
• Draw a flow |
| Handle and monitor the patient | • Explain safety and security procedures  
• Describe significance of command and control system in a hospital  
• Explain triage | GDA while handling emergencies  
• Maintain patient’s triage operation  
• Demonstrate the knowledge of techniques of handling and monitoring patient  
• Draw the human resource hierarchy of the hospital | chart of discharge process of a patient  
Interactive Lecture: Handling and Monitoring Patient  
Activity:  
• Visit a nearby hospital and observe the staff handling the patients  
• Make a report on logistics & supply management of the hospital |
| Transport the injured patient internally and externally | • Describe the internal and external transportation  
• State general principles of transportation  
• Explain the care required before transportation | Demonstrate how to carry a loaded stretcher  
• Perform cradles and drag method of lifting  
• Apply different types of tags of triage | Interactive Lecture: Transportation of Injured Patient  
Activity:  
• Tabulate the diseases covered under different tags of triage  
• Visit a nearby hospital and observe the transportation of patient on stretcher  
• Role play |
| Demonstrate the knowledge of different methods and types of immobilization | • Explain the significance of use of splint  
• Explain the types and purpose of traction  
• Explain the methods of skeleton traction  
• Describe spinal decompression | Demonstrate the types of casting  
• Identify the different types of splint  
• Immobilize the patient | Interactive Lecture: Methods of Immobilization  
Activity:  
• Visit a nearby hospital and observe the different types of casting  
• Visit a nearby hospital and observe the different types of traction |
| Prevent the accidents/injuries in children | • Describe the term suffocation and choking  
• State the risk factors associated with the child accident at home | Identify the hazards and prevention methods for fire, falls, scales, burns, glass related accidents, poisoning, suffocation and choking  
• Demonstrate the knowledge of accidents and the preventive methods | Interactive Lecture: Prevention of accidents/injuries in children  
Activity:  
• Prepare a chart of accidents/injuries that could happen to a child |
### Unit Title: Administration Of Medication

**Duration:** 15 Hours

**Location:** Classroom / Hospital / Clinic

<table>
<thead>
<tr>
<th>Learning Outcome</th>

<th>Performance Evaluation</th>
<th>Teaching and Training Method</th>
</tr>
</thead>
</table>
| Demonstrate the knowledge of basic principles of drug administration | • Explain drug administration  
• Classify medicine groups  
• Describe the legal aspects of record keeping | • Prepare a complete medication record  
• Demonstrate the knowledge of seven rights during assisting the drug administration | Interactive Lecture: Basic Principles of Drug Administration  
Activity: • Visit a nearby hospital and observe the medication chart of the patient  
• Visit a nearby hospital and prepare medication chart for 2 patients of different age group having different diseases |
| Demonstrate the knowledge of forms and routes of medication | • Enlist different forms of medicine  
• Describe the importance of forms v/s route in drug administration  
• Read the instruction on the label of the medicine  
• Describe various signs of allergy  
• Describe the meaning of standard abbreviation used in the medication chart | • Identify the common forms and routes of drug administration  
• Demonstrate the knowledge of precautions and contraindications, indication for use, side effects and adverse reaction of medicine | Interactive Lecture: Forms and Routes of Medication  
Activity: • Visit a nearby hospital and identify the suitable routes and form of drug administration for the children in given age group |
| Classify the drugs | • Describe the common side effects of antidepressant  
• Describe the classification of drugs | • Identify the drugs of different categories  
• Demonstrate the knowledge of use of drug for particular indication | Interactive Lecture: Classification of drugs  
Activity: • Visit a nearby hospital and observe the uses, contradiction and implications of particular drug category |
| Demonstrate the knowledge of drugs of cardiovascular system | • Enlist the drugs used for disrhythmia  
• Categorize the drugs in treatment of cardiovascular system | • Identify the effects and side effects of cardiovascular drugs  
• Demonstrate the knowledge of use, contraindication | Interactive Lecture: Drugs of cardiovascular system  
Activity: • Visit a nearby hospital and observe |
| Demonstrate the knowledge of storage and administration of medicine | • Explain the techniques of disposing a medicine  
• Describe the preventive measures to control the mistakes in drug administration  
• Describe the control measures used to prevent the spread of infection | • Demonstrate the knowledge of safe disposal of medicine  
• Identify the medical errors in drug administration  
• Adopt strategies in prevention of infection in drug administration | Interactive Lecture: Storage and Administration of Medicine  
Activity:  
• Visit a nearby hospital and observe the uses, contradiction and implications of cardiovascular system to decrease and increase the blood pressure |

| Unit Title: Physiotherapy | Demonstrate the knowledge of basic principles of physiotherapy | Explain physiotherapy.  
Describe the holistic approach used in physiotherapy  
State basic principles of physiotherapy | Demonstrate the knowledge of different techniques of physiotherapy  
Identify the need of physiotherapy in different condition of the patient | Interactive Lecture: Basic Principles of Physiotherapy  
Activity:  
• Visit a nearby hospital and identify the use of techniques of physiotherapy in different conditions of patients  
• Tabulate different techniques of physiotherapy |

| Demonstrate the knowledge of principles and techniques of good body mechanics | State basic principles of good body mechanics  
Describe the reasons for the use of proper body mechanics | Move an object properly to a new location  
Demonstrate good body mechanics | Interactive Lecture: Body Mechanics  
Activity:  
• Practice session of techniques of good body mechanics |

| Demonstrate the knowledge of exercise | Describe the purpose of exercise  
State the precautions to | Suggest exercise according to the patient is need  
Demonstrate the knowledge of | Interactive Lecture: Exercises for patients  
Activity:  
• Visit a nearby hospital and observe different categories of medicine/drug |
be taken by the patients while performing physical exercises
preparation, after care, risks and results associated with physical exercises
hospital and provide different exercise to any four patients

- Make a group and perform different type of physical exercises

Demonstrate the knowledge of active range of motion exercise
- Define active range of motion (ROM) exercise
- Explain the selection criteria of active ROM exercise
- Describe the types of active ROM exercises

Interactive Lecture:
Active Range of Motion exercise:
Activity:
- Tabulate the Do’s and Don’ts of the steps of workout

Demonstrate the knowledge of Passive Range of Motion exercise
- Define passive range of motion exercise
- State the care to be taken while giving passive exercise

Interactive Lecture:
Passive Range of Motion exercise:
Activity:
- Perform different passive ROM exercises

Demonstrate the knowledge of breathing and coughing exercises
- Describe the procedure of breathing exercise
- Describe the procedure of coughing exercise
- Explain the working of trifle

Interactive Lecture:
Breathing and Coughing Exercise
Activity:
- Perform different breathing and coughing exercise

<td></td>
</tr>
</tbody>
</table>

### Location:
- Classroom / Hospital / Clinic

### Duration:
- 20 Hours

### Knowledge Evaluation

- Explain about operation theatre
- Describe the aims of planning of OT
- State the standard size of OT
- Explain about different zones of OT with their significance
- Identify the aims of planning of OT, location, size and different areas of operation theatre
- Identify the staff present in OT
- Explain the procedure of care of instruments before and after use in operation theatre
- State the policies and procedures adopted for maintenance of OT
- Describe the duties of GDA in pre-operative preparation of the patient
- Enlist the information to be written on patient wrist band
- Explain the importance of the fowler’s position in post operative care
- Demonstrate the knowledge of the vital parameters to be observed before sending the patient in OT
- Prepare the patient for surgery
- Demonstrate the knowledge of care to be rendered by GDA in the post operative phase
methods of caring the patient required for surgical incision
- Explain different measures for corrections and their causes in case of risk of retention of urine post operative

| Demonstrate the knowledge of the steps of setting a goal and various learning approaches in higher education | • Explain SMART  
• Enlist the steps of goal setting  
• Describe the best practices of learning | • Demonstrate how to set the goals of different task using SMART steps  
• Perform deep and surface approach of learning | Interactive Lecture: Goal Setting Strategies  
**Activity:**  
• Identify five priority need of your life and prepare the short term and long term goal for them |
| Demonstrate the knowledge of Self-management | • State the obstacles in understanding of self-management abilities  
• Describe the factors which are not in control of | • Demonstrate the knowledge of self-management and attitude/confidence strategies  
• Identify techniques of handling | Interactive Lecture: Self-Management  
**Activity:**  
• Role Play |

- **Interactive Lecture: Fighting Fire**
  - **Activity:**  
    - Visit a hotel/multiplex/shopping mall to observe and record observations on the following:
      - Emergency exits
      - Location of fire alarms
      - Assembly points
      - Nearest alternative telephone
      - Internal shelter areas
      - First Aid equipment
| Demonstrate the knowledge of time management | Explain how to set priority of work in managing time | Manage the time effectively | Interactive Lecture: Time Management  
Activity:  
- Prepare a time log book |
| --- | --- | --- | --- |
| human being at workplace  
- Explain the strategies of self-management | Describe the basic strategies of time management | Demonstrate the knowledge of time management strategies | |
| | Explain how to use time wisely | Prepare TO DO LIST | |
| Demonstrate the knowledge of concept of critical thinking and ways to become critical thinker | Define critical thinking  
- Enlist major factors to be kept in mind during the judgement | Use critical thinking  
- Demonstrate the knowledge of ways to become critical thinker  
- Demonstrate the knowledge of elements of critical thinking | Interactive Lecture: Critical Thinking  
Activity:  
- Identify any five problems you have faced in the past life and note critical thinking technique that you have adopted to solve the problem |
| | Describe the ways to become critical thinker | | |
| Demonstrate the knowledge of stress management | Define stress  
- Explain ways to manage stress  
- Enlist the stress management skills required by GDA  
- Identify various problems caused by stress in human body and behaviour  
- Identify social and work related problems caused due to stress | Manage stress in day to day activities  
- Demonstrate the knowledge of effects of stress on physical, mental, social and work related problems  
- Adopt stress management skills required for the job role of GDA  
- Demonstrate the knowledge of techniques used for stress management | Interactive Lecture: Stress Management  
Activity:  
- Observe your surrounding people who are in stress and identify the health problems associated with them  
- Role Play |
9.0 Assessment Guide

Assessment is a process used for determining an individual’s progress or level of mastery/competence in an occupational area. It may be formative (continuous) and/or summative (final). It is a process of collecting evidence and making judgement about the extent to which a person demonstrates the knowledge and skills set out in the standards or learning outcomes of a unit of competency. Assessment should be done on the basis of information or evidence about the individual’s ability against clearly stated objectives or standards. A diversity of assessment methods is required to achieve the multiple purposes and to satisfy the requirements of competency based assessment. Appropriate evidence is to be collected from activities that can be clearly related to the Units of Competency. It should cover all the elements and performance criteria/indicators in the competency standards. Student’s achievements should be assessed by using the following methods of assessment.

<table>
<thead>
<tr>
<th>S.No.</th>
<th>Method of Assessments</th>

</tbody>
</table>

# Assessors will be certified by the State Education Board.

1. **Written test**: It allows candidates to demonstrate that they have the knowledge and understanding of a given topic.
2. **Practical test**: It allows candidates to demonstrate application of skills in simulated or real work conditions against competency standards (skill and academic standards).
3. **Oral test/viva voce**: It allows candidates to demonstrate communication skills and content knowledge. Audio or video recording can be done at the time of oral test or viva voce.
4. **Portfolio**: It is a compilation of documents that supports the candidate’s claim of competence that was acquired from prior learning and experience. Documents (including photo’s, newspaper articles, reports, etc.) of practical experience in the workplace or the community and photographs of the products prepared by the candidates related to the units of competency should be included in the portfolio.
5. **Project**: Projects (individual or group projects) are a great way to assess the practice skills on a deadline, but these should be given on the basis of the capability of the individual to perform the tasks or activities involved in the project. Projects should be discussed in the class and the teacher should periodically monitor the progress of the project and provide feedback for improvement and innovation.
6. **Direct Observation** - Direct observation requires a considerable degree of commitment from the observer and those being observed. Employability skills evaluation listed below in the table should be evaluated through direct observation by the teacher/trainer and appropriate records should be maintained for transparency in evaluation.

10. List of Tools, Equipment and Materials

The list given below is suggestive and an exhaustive list should be prepared by the teacher. Only basic tools, equipment and accessories should be procured by the Institution so that the routine tasks can be performed by the students regularly for practice and acquiring adequate practical experience.

1. Advanced Male and Female Catheterization Kit
2. Air Cushion
3. Airway Mannequin
4. Ambu Bag with Mask (Adult)
5. Artery Forceps
6. Auto-loading Stretcher made of aluminum alloy
7. Back Rest
8. Bath Tub
9. Bed Pan
10. Bed Sheet, Blanket, Pillow with Pillow Cover
11. Bed Side Locker
12. Birthing Simulator
13. Call Bell
14. Cardiac Table
15. Cervical Colour Set of Large Medium and Small
16. CPR Mannequin
17. Crash Card
18. Crutch
19. Cupboard
20. Dissecting Forceps
21. Doctors Table
22. Draw Sheet
23. Electronic Blood Pressure Monitoring Machine
24. Enamel Basin
25. Fire Extinguisher (5 KG ABC type)
26. Foot Step
27. Full Body Mannequin - Basic
28. Goggles  
29. Gown  
30. ICU Bed with Mattress  
31. IV Stand  
32. Kidney Tray  
33. Male Multi-Veno Intravenous Arm  
34. Malleable Splint Set (Large Medium and Small)  
35. Measuring Glass  
36. Nail Cutter  
37. Nail Filer  
38. Oral care Set  
39. Oxygen Cylinder with Connector, Key, Face Mask and Tubing  
40. Patient Examination Table  
41. Patient Remote Bell  
42. Pocket Mask  
43. Rubber Sheet (2 x 2 meters)  
44. Sand Bag  
45. Scissor  
46. Scoop Stretcher  
47. Simulation Equipment - Mannequins  
48. Spine Board  
49. Spoon  
50. Steel Basin 1 Set (3 Large, 3 Medium, 3 Small)  
51. Steel Bowl  
52. Steel Glass  
53. Steel Jug  
54. Steel Plate  
55. Steel Tray 1 Set (2 Large, 2 Medium and 3 small)  
56. Sterilizer  
57. Stethoscope  
58. Stop Watch  
59. Suction Apparatus  
60. Syringe Destroyer and Needle Burner  
61. Thermometer  
62. Towel  
63. Urinal Set (1 Male + 1 Female)  
64. Walker  
65. Weighing Machine  
66. Wheel Chair  
67. Wound Care Model Anatomical  
68. First Aid Kit

11. Teacher Qualifications

Qualification, competencies and other requirements for Graduate Teacher and Healthcare Assistant on contractual basis are as follows:

<table>
<thead>
<tr>
<th>S.No.</th>
<th>Qualification</th>
<th>Minimum Competencies</th>
<th>Age Limit</th>
</tr>
</thead>
</table>
| 1.    | Teacher B.Sc. Nursing & Midwifery (4 years) or 3 1/2 years Diploma in GNM with one year experience | - Effective communication skills (oral and written)  
- Basic computing skills.  
- Technical competencies (e.g., Should be able to perform and train the patient related skills | 18-37 years (as on Jan. 01 (year)  
Age relaxation to be provided as per Govt. rules. |
| 2.    | Healthcare Assistant 10+2 vocational course in Medical lab Technician, or 10+2 with science followed by certification/Diploma in MLT. | - Technical competencies (e.g., Should be able to perform and train the patient related skills  
- Should demonstrate skills and maintain lab | 18-37 years (as on Jan. 01 (year)  
Age relaxation to be provided as per Govt. rules. |
